

COVER LETTER

Date: May 20, 2024

Hiring Manager
GOLDBECK GmbH
Bielefeld, Deutschland

Dear Hiring Manager,

The opportunity to work at GOLDBECK GmbH is particularly appealing to me because of your commitment to innovation and excellence in building pioneering properties. Your approach to integrating advanced AI solutions into real-world applications aligns with my career aspirations and academic background.

During my Bachelor of Technology in Computer Science and Engineering, I acquired the understanding of data structures, algorithms, cybersecurity, and software engineering. My role as a Software Engineer at Gemini Solutions honed my skills in C, ASP.NET, and database management, where I contributed to developing and optimizing softwares.

At RWTH Aachen, my coursework and projects have deepened my knowledge of data analysis, machine learning, and ethical considerations in technology. For instance, I developed a car price prediction website utilizing Flask and Google Cloud, demonstrating my capability in data pre-processing, model training, and cloud deployment.

Your requirement for knowledge in API, frontend, and cloud development, ideally within the Microsoft environment, is well within my expertise. I have practical experience in C, Python, and Angular, and I am eager to expand my skill set further, particularly in Svelte and other emerging technologies. Moreover, I am fluent in English and I am also learning German, which will facilitate smooth communication within your team and with stakeholders.

Joining GOLDBECK GmbH as an AI Workstudent would be a pivotal step in my career, allowing me to apply my academic knowledge in a professional setting, gain hands-on experience with cutting-edge AI technologies, and be part of a forward-thinking organization. I am excited about the potential to grow within your team and contribute to your projects that stand at the forefront of technology and sustainability.

Thank you for considering my application.

Warm Regards,
Amlendu Shekhar
