Hiring Manager
Accenture Recruiting Team
Deutschland

Dear Hiring Manager,

I am writing to express my interest in the Data Science Workstudent position at Accenture in Aachen, Germany. Currently, I am pursuing a Master of Science in Data Science at RWTH Aachen University, and will graduate in April 2026. I believe that this position is a perfect match for my academic background, technical skills, and career aspirations.

During my academic journey, I have developed a solid foundation in data analysis, machine learning, and data visualization. My coursework has equipped me with expertise in using tools such as Pandas, NumPy, Matplotlib, TensorFlow, and Scikit-Learn. Additionally, I possess a strong interest in mathematics and statistics. I have also undertaken projects that involved data cleaning, feature engineering, and deploying machine learning models, such as a car price prediction website, which enhanced my hands-on experience in applying data science techniques to real-world problems. In my previous role as a Software Engineer L1 at Gemini Solutions, I gained practical experience in delivering client-focused solutions, developing and optimizing code, and working on projects using technologies like C, ASP.NET, and MySQL.

Accenture's mission to drive the energy transition through AI-supported engineering resonates deeply with my aspirations. The opportunity to contribute to the digitalization of infrastructure projects and support energy suppliers in their sustainability goals is incredibly motivating. I am particularly excited about the prospect of working on the development and validation of AI-based models and solutions to increase efficiency in energy infrastructure projects.

As a student, I am in a critical learning phase, and a position at Accenture would be very valuable for my professional growth. The chance to work with a team of experienced project managers and data scientists, contributing my own ideas while learning from industry leaders, is an unparalleled opportunity. I look forward to the possibility of discussing how I can contribute to your team and support Accenture's mission to shape a sustainable future.

Thank you for considering my application.

Warm Regards,
Amlendu Shekhar
